

# NovaMart Design System

Colours • Typography • Spacing • Radius • Components • Portal Colour Rules

Zidio Development – UI/UX Design Domain | March 2026 | Reference for Figma Build

**Purpose of this document.** This is the single source of truth for every colour, font style, spacing value, corner radius, and reusable component used across all 13 NovaMart screens (Customer, Vendor, and Admin portals). Before designing any screen in Figma, create Figma *Styles* for every token listed here. All teammates must reference these styles — no manual colour picking or font sizing on individual screens.

## Contents

1. Colour Palette (Core + Portal-Specific)
2. Portal Colour Rule
3. Typography Scale
4. Spacing Scale
5. Border Radius Scale
6. Core Component Library (8 components)
7. Figma Setup Checklist
8. Implementation Review — Corrections Log

# 1. Colour Palette

## 1.1 Core / Shared Colours

| Swatch                                                                            | Token Name     | Hex     | Usage                                            |
|-----------------------------------------------------------------------------------|----------------|---------|--------------------------------------------------|
|  | Text/Dark      | #374151 | Body text, headings on light backgrounds         |
|  | Text/Medium    | #6B7280 | Secondary text, captions, vendor names           |
|  | Text/Light     | #9CA3AF | Placeholder text, disabled labels                |
|  | Surface/White  | #FFFFFF | Card backgrounds, default screen background      |
|  | Surface/Gray   | #F9FAFB | Page backgrounds, input fields, alternating rows |
|  | Border/Default | #E5E7EB | Card borders, dividers, input outlines           |

## 1.2 Status Colours (used across all portals)

| Swatch                                                                              | Token Name        | Hex     | Usage                                           |
|-------------------------------------------------------------------------------------|-------------------|---------|-------------------------------------------------|
|  | Status/Green      | #15803D | Delivered, success, active timeline step        |
|  | Status/GreenLight | #F0FDF4 | Success banner backgrounds, delivered chip fill |
|  | Status/Amber      | #B45309 | Processing, pending, warning states             |
|  | Status/AmberLight | #FFFBEB | Pending chip backgrounds                        |

## 1.3 Customer Portal — Primary (C01–C16)

| Swatch                                                                              | Token Name    | Hex     | Usage                                                                              |
|-------------------------------------------------------------------------------------|---------------|---------|------------------------------------------------------------------------------------|
|  | Primary/Brand | #4F46E5 | All customer CTAs: Add to Cart, Pay, Shop Now, active bottom-nav icon, hero banner |
|  | Primary/Light | #EEF2FF | Highlighted cards, selected filter chip background, badge fills                    |

## 1.4 Vendor Portal — Primary (V01–V12)

| Swatch                                                                            | Token Name              | Hex     | Usage                                                                             |
|-----------------------------------------------------------------------------------|-------------------------|---------|-----------------------------------------------------------------------------------|
|  | <b>Vendor/Teal</b>      | #0F766E | All vendor CTAs: Save Changes, Publish Listing, Go Live, progress bar active step |
|  | <b>Vendor/TealLight</b> | #F0FDFA | Vendor section backgrounds, store preview highlight                               |

## 1.5 Admin Panel — Primary (A01)

| Swatch                                                                              | Token Name              | Hex     | Usage                                                      |
|-------------------------------------------------------------------------------------|-------------------------|---------|------------------------------------------------------------|
|    | <b>Admin/Navy</b>       | #193B6D | Admin sidebar background, admin header bar                 |
|    | <b>Admin/Coral</b>      | #DC4E3A | Flagged content counters, ban/reject actions, error states |
|  | <b>Admin/CoralLight</b> | #FFF1F0 | Flagged row backgrounds, alert banner fills                |

## 2. Portal Colour Rule

Each portal in NovaMart has its own primary action colour. This is intentional — it gives users a subconscious cue about which "mode" they are in, similar to how Gmail and Google Drive share a design language but feel distinct. **Core colours, typography, spacing, radius, and components remain identical across all portals** — only the primary accent colour changes.

| Portal          | Colour                                                                             | Token                                            | Applies to screens                                                                                                                     |
|-----------------|------------------------------------------------------------------------------------|--------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Customer Portal |   | Primary/Brand<br>#4F46E5                         | C01 Homepage, C03 Search, C06 Product Detail, C12 Cart Drawer, C13 Checkout, C14 Order Confirmation, C15 My Orders, C16 Order Tracking |
| Vendor Portal   |   | Vendor/Teal<br>#0F766E                           | V01–V04 Onboarding Wizard, V05 Store Visual Editor, V07 Product Listing Form, V12 Revenue Charts Dashboard                             |
| Admin Panel     |  | Admin/Navvy<br>#193B6D<br>Admin/Coral<br>#DC4E3A | A01 Admin Dashboard — Navy for sidebar/header, Coral for flagged content and reject actions                                            |

## 3. Typography Scale

**Font family:** Inter (Google Fonts, free, available natively in Figma)

| Style Name   | Sample                            | Weight   | Size / Line-height |
|--------------|-----------------------------------|----------|--------------------|
| Display/H1   | NovaMart                          | Bold     | 32px / 40px        |
| Display/H2   | Personalised Picks                | Bold     | 24px / 32px        |
| Display/H3   | Order Placed!                     | SemiBold | 20px / 28px        |
| Body/Large   | Search products, brands & more    | Regular  | 16px / 24px        |
| Body/Default | Cotton Kurta Set — StyleHub Delhi | Regular  | 14px / 20px        |
| Body/Small   | 4.6 • 12k+ orders                 | Regular  | 12px / 16px        |
| Label/Bold   | Shop Now                          | SemiBold | 14px / 20px        |
| Label/Small  | MONSOON SALE                      | SemiBold | 12px / 16px        |

**Figma setup:** Create each row above as a Text Style named exactly as shown (e.g. **Display/H1**, **Body/Default**). Apply via the right-panel Text Style picker — never set font size manually on a layer.

## 4. Spacing Scale

---

| Visual                                                                            | Value | Token | Usage                                                        |
|-----------------------------------------------------------------------------------|-------|-------|--------------------------------------------------------------|
|  | 4px   | xs    | Icon padding, tight gaps between icon and label              |
|  | 8px   | sm    | Gap between stacked text lines, chip internal padding        |
|  | 12px  | md-sm | Card inner padding, gap between product cards                |
|  | 16px  | md    | Standard screen padding (left/right margins)                 |
|  | 24px  | lg    | Gap between major sections (e.g. Hero to Personalised Picks) |
|  | 32px  | xl    | Gap between large card groups                                |
|  | 48px  | 2xl   | Section separators (e.g. above Bottom Nav)                   |
|  | 64px  | 3xl   | Page-level top/bottom breathing room                         |

## 5. Border Radius Scale

---

| Visual                                                                              | Value  | Usage                                               |
|-------------------------------------------------------------------------------------|--------|-----------------------------------------------------|
|  | 4px    | Buttons (small / icon buttons)                      |
|  | 8px    | Cards, input fields                                 |
|  | 12px   | Modals, bottom sheets (e.g. Cart Drawer)            |
|  | 16px   | Large cards (hero banner, product detail image)     |
|  | 24px   | Chips / tags (filter chips, status chips)           |
|  | 9999px | Fully rounded pills, avatar circles, badge counters |

## 6. Core Component Library (8 Components)

Build each of these once on the **Component Library** Figma page, then reuse as instances across all 13 screens. Each component should use variants where noted.

| # | Component             | Variants / Notes                                                                                                                                                       |
|---|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Button                | Primary, Secondary, Ghost. Primary uses portal accent colour (Brand/Teal/Navy per Section 2). Radius: 8px. Height: 48px.                                               |
| 2 | Input Field           | Default, Focused, Error, Disabled. Background Surface/Gray, border Border/Default, radius 8px, 16px padding.                                                           |
| 3 | Product Card          | Image (top, 4:3), title (Body/Default bold), vendor name (Body/Small, Text/Medium), price + strikethrough original price, star rating row. Used in C01, C03, C12, C15. |
| 4 | Bottom Navigation Bar | 5 fixed tabs: Home, Search, Cart (with badge), Orders, Profile. Active tab uses Primary/Brand; inactive uses Text/Medium. Height: 64px.                                |
| 5 | Top App Bar           | Variants: with-back-arrow, with-title-only, with-action-icon. Height: 56px, Body/Large for title.                                                                      |
| 6 | Badge / Chip          | Variants: Category chip (filter), Status chip (Delivered / Processing / Out for Delivery using Status colours), Counter badge (cart count, fully-rounded radius).      |
| 7 | Rating Stars          | 1–5 filled stars, Status/Amber fill colour, Body/Small size, paired with numeric rating and optional review count.                                                     |
| 8 | Toast / Snackbar      | Variants: Success (Status/Green), Error (Admin/Coral), Info (Primary/Light). Radius 8px, slides from bottom.                                                           |

## 7. Figma Setup Checklist

Create page **Design System** as the first page in the file

Create all 17 colour styles from Section 1 (named exactly as shown, e.g. **Primary/Brand**)

Create all 8 text styles from Section 3 (e.g. **Display/H1**, **Body/Default**)

Document the spacing scale (Section 4) as a visual reference frame — not Figma styles, but a labelled guide

Document the radius scale (Section 5) the same way

Build all 8 components from Section 6 with correct variants

Confirm with team: Customer screens = Primary/Brand, Vendor screens = Vendor/Teal, Admin screen = Admin/Navy + Admin/Coral

Only after the above is done — begin building C01–A01 screens

## 8. Implementation Review — Corrections Log

This section tracks colour-consistency corrections found during the first review of generated screens. Update this table as new issues are found and resolved.

| # | Screens                                              | Issue Found                                                                                                                                                                                                            | Required Fix                                                                                                                                                           | Status |
|---|------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| 1 | V01–V04 Onboarding Wizard                            | Progress bar active step, “Next” button border/text, and “Go Live” button currently use Primary/Brand #4F46E5 (purple/indigo). Per the Portal Colour Rule (Section 2), all Vendor Portal screens must use Vendor/Teal. | Replace all instances of #4F46E5 on V01–V04 with Vendor/Teal #0F766E: progress bar fill, active step label, “Next” button outline + text, “Go Live” button background. | Open   |
| 2 | V05 Store Editor, V07 Product Listing, V12 Analytics | Verified correct — all use Vendor/Teal #0F766E for primary CTAs (“Save Changes”, “Publish Listing”, chart accents).                                                                                                    | No action needed.                                                                                                                                                      | Passed |
| 3 | A01 Admin Dashboard                                  | Verified correct — Admin/Navy #193B6D sidebar, Admin/Coral #DC4E3A on Flagged Content card, green/red Approve/Reject buttons.                                                                                          | No action needed.                                                                                                                                                      | Passed |
| 4 | C01–C16 Customer screens                             | Verified correct — Primary/Brand #4F46E5 used consistently for CTAs, active bottom-nav tab, hero banner, and checkout Pay button.                                                                                      | No action needed.                                                                                                                                                      | Passed |

**Action for team:** Before moving V01–V04 into the Figma Component Library or linking them into the Prototype Flows page, swap every #4F46E5 accent on these four screens to Vendor/Teal #0F766E. This keeps the vendor journey (Onboarding → Store Editor → Product Listing → Analytics) visually consistent in a single accent colour, as required by Section 2.
