

NovaMart • User Journey Maps

Day 3 Deliverable | Zidio Development – UI/UX Design Domain | March 2026

3 Journeys: Customer Shopping Flow • Vendor Onboarding Flow • Order Tracking Flow

What is a User Journey Map? A User Journey Map visualises the end-to-end experience a persona has while completing a goal — from the moment they feel a need to the moment it is resolved. Each map captures the **stages** of the journey, **actions** taken at each stage, **emotions** felt, **weaknesses** encountered, and **strengths/opportunities** that address each pain point. These maps are the direct input to NovaMart’s wireframing and interaction design work in Weeks 2 and 3.

Journey Index

#	Journey Name	Primary Persona	NovaMart Features
1	Customer Shopping Flow	Priya Sharma (Marketing Manager, Mumbai)	F02 Discovery, F03 Checkout
2	Vendor Onboarding Flow	Kavya Reddy (Home Reseller, Mumbai)	F01 Onboarding, F05 Dashboard
3	Order Tracking Flow	Sunita Kapoor (Homemaker, Mumbai)	F04 Real-Time Tracking

Emotion Key

Happy / Delighted Neutral / Uncertain Frustrated / Anxious

1. Customer Shopping Flow

Persona: Priya Sharma, 28, Marketing Manager, Mumbai **Scenario:** Priya wants to buy a minimalist ceramic lamp for her new apartment. She discovers it on Instagram and switches to a marketplace to purchase. **Goal:** Find the exact product, verify the vendor, and complete checkout in under 5 minutes.

Stage	1. Trigger	2. Discovery	3. Evaluation	4. Cart	5. Checkout	6. Post-Purchase
Actions	- Sees ceramic lamp Reel - Saves to IG collection	- Opens NovaMart app - Applies "Minimal" filter	- Opens 3 product cards - Checks delivery date	- Adds to cart - Views slide-in drawer	- Enters saved address - Pays via UPI	- Tracks order live - Leaves photo review
Touchpoints	Instagram Reels	Search bar + filter chips	Product page, reviews	Cart drawer	Single-page checkout	Tracking page
Emotion	Happy Excited, found lamp	Neutral Uncertain of results	Neutral Cautiously optimistic	Happy Cart is clean	Happy Paid in 2 taps	Happy Lamp matches photos
Weaknesses (Current Pain Points)	- No direct link to marketplace - Manual search required	- Competitors show sponsored ads - Style filters missing	- Return policy buried - Vendor name hard to find	- Cart redirects to new page - Breaks browsing flow	- Multi-step process - UPI is not the default	- No review prompts - No tailored recommendations
Strengths (NovaMart Opps)	- IG deep-link integration "Find on NovaMart" sticker	- Style-based filter chips - Zero sponsored top slots	- Vendor trust card visible - Policy in one line	- Persistent cart drawer - Delivery date always visible	- Single-page checkout - UPI set as default method	- Auto review prompt "You might also like"

Emotion Curve

2. Vendor Onboarding Flow

Persona: Kavya Reddy, 26, Home-based Fashion Reseller, Mumbai Scenario: Kavya has been selling on Meesho but wants a platform where she can build her brand identity. She decides to register as a vendor from her phone. Goal: Register, set up her store, and list 3 products in one evening session.
--

Stage	1. Awareness	2. Registration	3. Store Setup	4. First Listing	5. Go Live
Actions	- Sees NovaMart IG ad - Taps "Start Selling"	- Verifies phone OTP - Enters bank details	- Uploads shop logo - Writes store bio	- Uploads 3 product photos - Writes titles & prices	- Store goes Live - Shares link to Instagram
Touchpoints	IG ad → Landing page	Mobile OTP, form wizard	Shop visual editor	Product listing form	Success screen, share link
Emotion	Happy Hopeful for better sales	Neutral Anxious about form length	Happy Excited for brand page	Neutral Tedious form filling	Happy Proud to share store
Weaknesses (Current Pain Points)	- Rivals bury fee structure - Trust gap from day one	12+ steps on Amazon - Requires desktop use	- No brand customisation - Stores look identical	- Repetitive form filling - No duplicate listing tool	- No celebratory moment - Just a plain text message
Strengths (NovaMart Opps)	- Transparent commission rates - Clear on landing page	4-step wizard with sticky bar "Save for later" options	- Live preview visual editor - IG link integration	"Copy listing" for variants - AI title suggestions	- Animated celebration screen - Auto-generated share card

Emotion Curve

3. Order Tracking Flow

Persona: Sunita Kapoor, 38, Homemaker, Mumbai **Scenario:** Sunita placed an order for a kitchen organiser set 2 days ago. She wants to know if it will arrive before Friday. **Goal:** Check order status quickly and understand exactly when the package will arrive without calling support.

Stage	1. Need to Know	2. Find Order	3. View Status	4. Out for Delivery	5. Delivery
Actions	- Remembers order - Opens NovaMart app	- Taps "My Orders" - Finds order via image	- Views timeline steps - Checks delivery date	- Gets push notification - Opens live map	- Collects package - Marks as received
Touchpoints	Home screen	Profile → My Orders	Vertical timeline page	Push alert, live agent map	Delivery confirm screen
Emotion	Neutral Anxious about Friday	Neutral Takes a moment to find	Happy Relieved to see timeline	Happy Excited, almost here	Happy Satisfied with quality
Weaknesses (Current Pain Points)	- No proactive alerts - Must check manually	"Orders" tab buried - Poor navigation IA	- Tracking shows vague info - No current city visible	- No live agent map - Blind waiting time	- No simple confirm button - Platform assumes delivery
Strengths (NovaMart Opps)	- Proactive 24hr push alert - Clear time windows	"My Orders" on bottom nav 1-tap accessibility	- Vertical active pulse timeline - Expected date in bold	- Live map with agent pin "X stops away" counter	1-tap delivery confirmation - Auto-trigger review prompt

Emotion Curve

4. Cross-Journey Insights & Design Principles

Insight	Seen in	Root Cause	NovaMart Design Principle
Trust must be earned at every single touchpoint	Journeys 1, 2, 3	Competitors hide vendor info, fees, and delivery details until the end.	• Show trust signals proactively • Vendor ratings, full price early
Emotion dips at form-filling stages	Journey 2	Repetitive data entry with no progress visibility causes user anxiety.	• Progress wizards with time estimate • Smart autofill features
Navigation to key actions is often 2+ taps too deep	Journeys 1, 3	Feature-bloat causes important actions to be deprioritised in the IA.	• Bottom nav: Home, Search, Orders • Key actions 1 tap away
Delight moments and celebrations are missed	Journeys 1, 2, 3	Platforms treat transactions as the end; post-purchase is ignored.	• Design celebration moments • Share prompts and success animations
Mobile-first is an absolute non-negotiable requirement	Journeys 1, 2, 3	Vendor onboarding on competitors often requires desktop access.	• 100% mobile completable flows • Thumb-friendly, no horizontal scroll

Next Step (Day 4): These journey maps feed directly into the NovaMart **Sitemap and Information Architecture**. Each stage in the journey maps to a screen or section in the sitemap. The **weaknesses** in the emotion dips are the exact screens where wireframing effort should be concentrated in Day 5.
