

NovaMart • Sitemap & Information Architecture

Day 4 Deliverable | Zidio Development – UI/UX Design Domain | March 2026

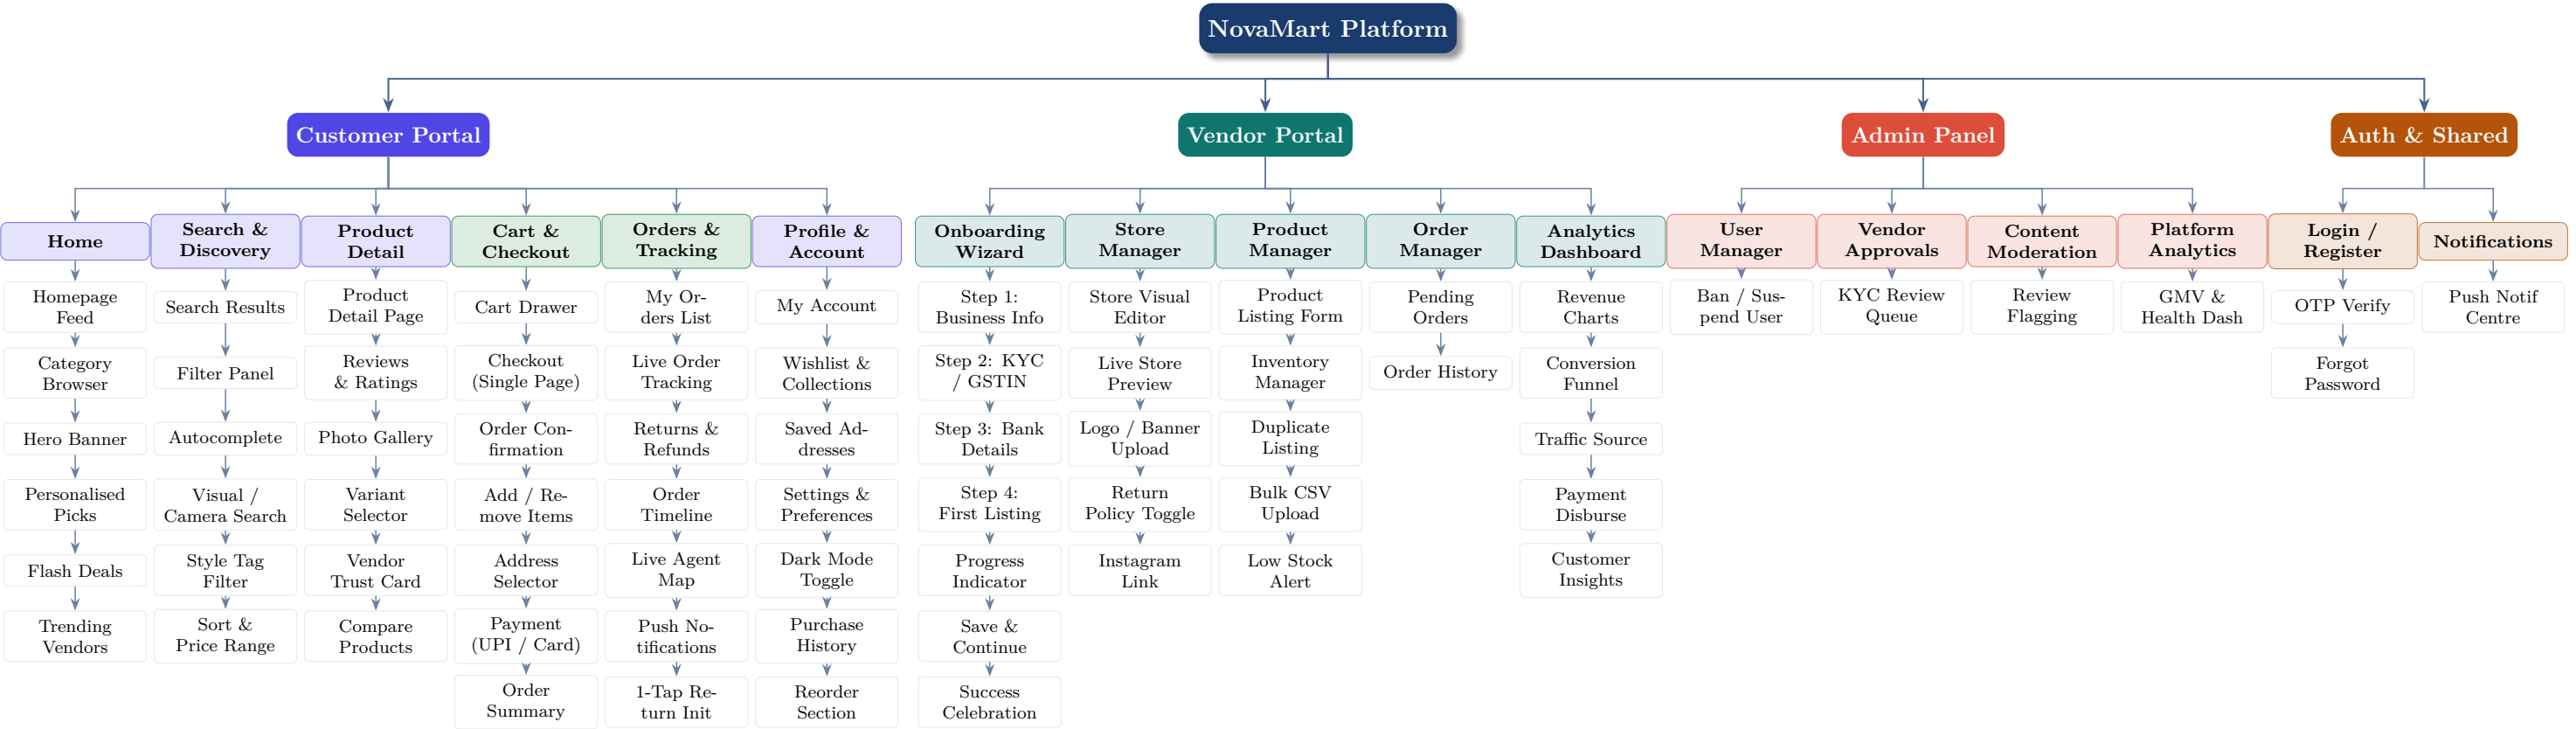

Covers: Customer Portal • Vendor Portal • Admin Panel • Navigation Hierarchy • Screen Inventory

What is an Information Architecture? The sitemap defines *every screen* in NovaMart, how they are grouped, and how a user navigates between them. It is the structural skeleton that wireframes (Day 5) and high-fidelity screens (Week 2) are built on. A well-designed IA ensures users never get lost, can always reach any page in ≤ 3 taps, and that the navigation reflects mental models uncovered in the persona and journey map research.

NovaMart has 3 distinct portals

#	Portal	Primary Users	Core Purpose	Screens	Journeys
1	Customer Portal	Priya, Arjun, Sunita, Rohit, Vinod	Browse, discover, purchase, track orders	22 screens	J1, J3
2	Vendor Portal	Kavya, Sameer, Meena	Onboard, list products, manage orders, view analytics	16 screens	J2
3	Admin Panel	Platform ops team	Moderate content, manage users, view platform analytics	10 screens	—
	Shared / Auth	All users	Login, register, OTP, forgot password, notifications	6 screens	All
Total screens across NovaMart				54	

1. Full Sitemap — All Portals (Vertical Flow)

2. Navigation Hierarchy & Bottom Navigation Design

Customer Bottom Navigation (5 tabs)

#	Tab	Screens Accessible	Taps
1	Home	Feed, Categories, Flash Deals, Trending Vendors	1
2	Search	Search Results, Filters, Visual Search	1
3	Cart	Cart Drawer, Checkout, Confirmation	1
4	Orders	My Orders, Tracking, Returns	1
5	Profile	Account, Wishlist, Addresses, Settings	1

IA Rule: Every primary customer action is reachable in **1 tap** from the bottom nav. No core action requires more than **3 taps** from the home screen. This directly resolves the pain point where Sunita could not find **My Orders** on competitors.

Vendor Dashboard Navigation (Sidebar)

Vendor Context: The vendor portal uses a persistent left sidebar on desktop/tablet, and a hamburger drawer on mobile. Dashboards contain high data density, so a bottom navigation bar is not suitable as it consumes vertical screen space needed for data tables.

3. Complete Screen Inventory — 54 Screens

ID	Screen Name	Portal / Section	Primary User Action	Linked Persona Pain Point	Priority
Auth & Shared (6 screens)					
S01	Login / Register	Auth – All portals	Enter phone, verify OTP	Vinod: needs simple clear login	P1
S02	OTP Verification	Auth – All portals	Enter 6-digit OTP	Sunita: one-tap actions preferred	P1
S03	Forgot Password	Auth – All portals	Reset via OTP	General usability	P2
S04	Notification Centre	Shared – All	View all push alerts	Sunita: no proactive alerts on rivals	P2
S05	Onboarding Splash	Shared – New users	View app value proposition	All new users	P1
S06	Settings	Shared – All	Dark mode, language, font size	Vinod: accessibility; Rohit: dark mode	P1
Customer Portal (22 screens)					
C01	Homepage Feed	Customer – Home	Browse personalised feed	Priya: needs visual discovery feed	P1
C02	Category Browser	Customer – Home	Browse by category icon	Sunita: navigates only by category	P1
C03	Search Results	Customer – Search	View filtered results	Priya: zero sponsored top 3 slots	P1
C04	Filter Panel	Customer – Search	Apply style, price, rating	Arjun: needs spec-level filters	P1
C05	Visual Camera Search	Customer – Search	Upload or photograph item	Arjun & Rohit: missing on rivals	P2
C06	Product Detail Page	Customer – PDP	View images, specs, vendor	Arjun: full specs; Priya: vendor card	P1
C07	Photo Gallery	Customer – PDP	Zoom and swipe images	Priya: low image quality on rivals	P1
C08	Variant Selector	Customer – PDP	Choose size, colour	Priya: size inconsistency pain point	P1
C09	Vendor Trust Card	Customer – PDP	View vendor rating, policy	Priya: return policy buried 3 levels	P1
C10	Product Comparison	Customer – PDP	Compare up to 3 products	Arjun: no compare tool on any rival	P2
C11	Reviews Section	Customer – PDP	Read and filter reviews	Arjun: filter verified purchase only	P1
C12	Cart Drawer	Customer – Cart	Add/remove, view total	Priya: cart redirects away on Flipkart	P1
C13	Checkout Single Page	Customer – Cart	Address, payment, summary	All: multi-step checkout = drop-off	P1
C14	Order Confirmation	Customer – Cart	View success, share	J1: no celebratory moment on rivals	P1
C15	My Orders List	Customer – Orders	View all orders + status chips	Sunita: Orders buried on all platforms	P1
C16	Live Order Tracking	Customer – Orders	View timeline, live map	Sunita: vague "In transit" on rivals	P1
C17	Push Notification	Customer – Orders	Receive delivery alerts	Sunita: no proactive alert on Meesho	P1
C18	Returns & Refunds	Customer – Orders	Initiate 1-tap return	Sunita: 6-step return on Amazon	P1
C19	My Account	Customer – Profile	Edit profile, preferences	Vinod: needs large text, clear labels	P2
C20	Wishlist Collections	Customer – Profile	Save and organise items	Priya: heavy wishlist usage observed	P2

ID	Screen Name	Portal / Section	Primary User Action	Linked Persona Pain Point	Priority
C21	Saved Addresses	Customer – Profile	Manage delivery addresses	Priya: address disappears on Flipkart	P2
C22	Reorder Section	Customer – Profile	Reorder past purchases 1-tap	Sunita: buys same items repeatedly	P2
Vendor Portal (16 screens)					
V01	Onboarding Step 1	Vendor – Onboarding	Enter business info	Kavya: Amazon needs 12+ steps	P1
V02	Onboarding Step 2	Vendor – Onboarding	GSTIN optional, KYC	Kavya: approval delays on Amazon	P1
V03	Onboarding Step 3	Vendor – Onboarding	Bank account details	Kavya: payment clarity needed	P1
V04	Onboarding Step 4	Vendor – Onboarding	First product listing	Kavya: wants live same evening	P1
V05	Store Visual Editor	Vendor – Store	Logo, cover, bio, IG link	Kavya: zero brand identity on Meesho	P1
V06	Live Store Preview	Vendor – Store	Preview customer-facing page	Kavya & Meena: brand storytelling	P1
V07	Product Listing Form	Vendor – Products	Add title, price, photos	Kavya: repetitive forms; Meena: photos	P1
V08	Inventory Manager	Vendor – Products	View stock, set reorder alerts	Sameer: no stock velocity on any rival	P1
V09	Bulk CSV Upload	Vendor – Products	Import product catalogue	Sameer: 50+ products, one-by-one fails	P2
V10	Pending Orders	Vendor – Orders	Confirm, dispatch orders	Kavya: manual WhatsApp tracking now	P1
V11	Order History	Vendor – Orders	View all past orders	Sameer: fragmented on Flipkart Hub	P2
V12	Revenue Charts	Vendor – Analytics	Daily/weekly/monthly GMV	Sameer: checks sales every morning	P1
V13	Conversion Funnel	Vendor – Analytics	Views-to-purchase rate	Sameer: no conversion data anywhere	P1
V14	Traffic Sources	Vendor – Analytics	Organic vs paid vs referral	Sameer: zero attribution on Amazon	P2
V15	Payment Disbursement	Vendor – Payments	View payout schedule	Kavya: 7-15 day delay, cash flow issue	P1
V16	Customer Inbox	Vendor – Messages	Reply to buyer queries	Kavya: no post-purchase message thread	P2
Admin Panel (10 screens)					
A01	Admin Dashboard	Admin – Overview	GMV, active vendors, flags	Platform ops daily view	P1
A02	User Manager	Admin – Users	Search, ban, suspend	Platform integrity	P1
A03	Vendor Approval Queue	Admin – Vendors	Review KYC, approve/reject	Vendor onboarding gate	P1
A04	Content Moderation	Admin – Content	Flag and remove listings	Counterfeit and inappropriate content	P1
A05	Review Flagging	Admin – Content	Approve disputed reviews	Arjun: fake reviews erode trust	P2
A06	Platform Analytics	Admin – Analytics	GMV, orders, active users	Business reporting	P2
A07	Payout Manager	Admin – Finance	Approve vendor disbursements	Kavya: payment delay pain point	P2
A08	Dispute Centre	Admin – Support	Resolve buyer-seller disputes	Sameer: 2-week resolution time	P2
A09	Category Manager	Admin – Catalogue	Add/edit categories	Meena: no artisan category exists	P2
A10	Notification Blaster	Admin – Comms	Send platform-wide alerts	Flash sale coordination	P3

Next Step (Day 5): Take all **P1 screens** into Figma and create low-fidelity wireframes for mobile + desktop. Priority order: C01 Homepage, C03 Search Results, C06 Product Detail, C13 Checkout, C16 Order Tracking, V05 Store Editor, V07 Product Listing, V12 Revenue Charts.
